

Innovative Eco-tourism Advancement Efforts In Raigarh Division

MAN CAN DO ANY THING, IT IS AN EXAMPLE WHERE ROCKY HILLS ARE CHANGED IN FORM OF GREEN COVER. HERE FOREST DEPARTMENT HAS DONE EXEMPLARY AFFORESTATION AGAINST THE PHYSICAL EFFECT OF SOUTHERN ASPECT.

Eco-Park Binjkot

Eco-Park Binjkot can prove that Eco-Tourism is the world's largest growing civilian industry with no sign of slowing down in the twenty-first century. With the help of ecologists and students this place of JFM Committee Binjkot provides a new dimension and has a multiplier effect, for every rupee invested in building the infrastructure and the revenue generated is more than three times. It is developed within the carrying capacity of the natural resources, which involves overall development of the local community with a better understanding and appreciation of natural and cultural features of the host population leading to inter-regional and inter-cultural understanding for sustainable development.

The involvement of the local communities and other stakeholders is an important component to achieve the goals of eco-tourism, and for this, one of the significant tasks is the capacity building of all stakeholders for their proper orientation and skill development.
